

IZIKO MUSEUM \ cape town - south africa

Cape Town's Iziko museum circuit is the group of African museums that promotes respect for the nation's various cultures and inspires each visitor to celebrate the variety of cultural difference around the world.

TECHNICAL APPLICATION The Cape Town museum building is served with two types of unit: 2 FOCS CA air-cooled water chillers and 1 four-pipe ERACS/Q unit capable of combining cooling and heating capacity at the same time, both in the super low noise version. The system's cooling capacity exceeds 1300 kW, while heating capacity is more than 1000 kW.

	2x FOCS CA 1922 SL	ERACS/Q 2022 SL
Pf [kW]	2x 420	443
Pt [kW]	-	474
Ptr [kW]	-	594
